---

## GRADUATION PROJECT

---

**Name,** *Student Affairs System.*

**Grade,** *Excellent*

**Description,** *Project (Android + IOS + Web + Web Dashboard For TheAdmin )*

### **Problem:**

=====

The occurrence of accumulation of student and graduates during any paper or financial dealings with students affairs

So we try to find a solution to solve this problem by creating a reservation system for attendance and dealing with student affairs “to pay university fees or obtain certificate

### **Solution:**

=====

So, we created system accessed via web and cell phones, it is focused on student affairs services,

The main service is enabling students to choose appointments in which they can benefit from the student affairs services and providing full details on every services and the latest updates or News concerning the faculty

**My Role,** *My Role : Team Leader + Back-End Developer php + building an Api for app developer+ Database*
